Signature _____ **Date** _____

Royal Kennebecasis Yacht Club Marine Services Information

It is the objective of the RKYC to make the boating experience pleasurable for all members and visitors to our Club. As such members are requested to consider the impact of their actions on the environment and other members.

Docks

The RKYC docks are 8 feet wide, which does not provide adequate room for two people to safely pass if hoses, power cords, rope, garbage, and coolers are left on the dock. It is the responsibility of each boat owning member to keep their area uncluttered. ***If you fail to do this please check at the Spar Shed for the items you are missing. We will clear the docks of items improperly stored if safety becomes an issue.*** No permanent fastenings of any kind are to be placed on the docks. Carpeting & hooks are to be removed from the pilings at the end of the season.

Power Usage

The power supply on the docks is intended for trickle chargers and not for running air conditioning, refrigerators or supplying all the power needs of your boat. Please use common sense, as there can be a significant voltage drop further out the dock that may cause damage to other boater's equipment. Power has been upgraded to 30 amp in a section of C Dock. ***Modifications to dock receptacles, to provide a different voltage or amperage, are not permitted.***

Garbage

Garbage bins are located by the Spar Shed and please recycle any items that you can. ***Garbage bins are for garbage created from boating not from your household.***

Waste Fluids

Please properly dispose of used oil, antifreeze, and other toxic chemicals. There is a disposal tank for waste oil by the spar shed - under no circumstances dump into the river or on the ground.

Gas Dock

No one other than the person responsible for fueling can be on the boat during refueling. The gas dock attendant will not pump the fuel for you – no one knows your boat better than you and the pumping of fuel is the owners' responsibility. All fueling should take place at the gas dock. Fueling at the dock (even dingys) creates an unnecessary hazard to the marina. All passengers must disembark before fuelling begins. Cheques are not accepted as payment – cash, and most credit cards are.

Summer Trailer Storage

If you do not store your boat at the RKYC, there will be a charge for storing your trailer at the Club. Please check with the Yard Manager as to where your trailer should be stored. our trailer must be registered with the office. An appropriate hitch lock should be used to prevent theft of your trailer.

Parking

Ample parking is available. Please do not park on the main wharf or particularly on the breakwater leading to A Dock. This area is for loading/unloading only.

Haul/Launch

A member or designated representative must be present at the time of launch and haul out to assume responsibility for their boat.

The opportunity for an early launch or haul out may exist and in some cases be required. Please check with the Yard Manager if you are interested.

Late Launch

If you are not ready to launch on the official launch date, there will be a minimum 3 - week wait before your launch will occur. This allows marina staff to complete marina installation and install masts. ***We encourage all members to be ready to go on the main launch weekend. We believe this yields the greatest efficiency for the Club and the member.***

Masting

Because of the number of boats now stored in the yard, waiting to remove your mast from the spar shed until after launch is strongly recommended and appreciated. After launch, masts can be moved out and arrangements made to have them installed with the help of the Club Crane.

Tools

The Spar Shed has a wide availability of tools that can be borrowed for your use on Club Property. Please ensure they are returned at the end of the day and treat them like they were your own.

Berth Assignment

The assignment of berths is based on seniority, safety, and the size of the boat. The final decision rests with the Marine Services Committee.

Volunteers

The Club is heavily dependant on volunteers, particularly at the time of putting the marina in and taking it out and during launch and haul out. Please contact the office if you are willing to assist in any area.

Wake

The Marina and area surrounding the marina are no wake zones. A wake can be an inconvenience at best and dangerous if a boat is rocked during mast installation.

Work Safe Policy

The consumption of alcohol by those directly involved in marina operations whether acting as a volunteer or employee is not acceptable.
